01

Introduction

EKS Consulting Engineers is a multidisciplinary consulting engineering and management company with vast years of experience in Civil Engineering Services. The company was established in South Africa in 2010. The company provides outstanding engineering, management and specialist technical services to the government and private sector clients.

02

Vision

We strive to provide modified solutions that eventually support sustainable development and to be South Africa's World Class leader in the skill of supplying sustainable engineering solutions.

Our Values

EKS Consulting Engineers values form the foundation of our commitment to our client's relationships, our promise to our people and the contribution we make to the communities in which we live in and work for.

- We aim to set industry standards, benefit communities and make significant contribution throughout the developed and developing world.
- We cultivate human achievement through excellence, innovation and collaboration
- We celebrate diversity and respect others by acting with integrity and honesty
- We work to build a vibrant and brighter future for all.
- We subscribe to good corporate governance, citizenship and business ethics

03

Mission

We plan to work hand in hand with people. Through listening and understanding, we will be able to drive towards achieving clients goals. This is mostly based on experience, whilst working with several consulting engineers, in meetings held between clients, community and other contractors.

Be well acquainted and co-operate closely with a number of highly recognized and well established firms of different civil engineering disciplines providing services that can complement the services offered by EKS Consulting Engineers.

04

Services

EKS Consulting Engineers provides a wide range of civil engineering services. These services include, amongst other, the following main fields of activity:

- Transportation
- Water and Sanitation
- Buildings and Structures
- Project Management
- Water and Waste Water Treatment
- Environmental
- Community Planning and Development
- Storm Water Management

RECENT TECHNOLOGIES AND SOFTWARES

Photo: View showing slushing of G1 base in preparation for priming

05

Company Resources

EKS Consulting Engineers uses recent technologies and softwares for planning and designing of civil projects.

- Microsoft Office 2018
- Microsoft Projects for effective project management, 2018 Civil Designer
- 3D AutoCAD 2018 for drafting
- Sidra for traffic analysis programme
- Water mate for water networks analysis and designs
- Pipe mate for pipes design
- Road mate for roads design
- Rubicon for pavement design and analysis
- Prokon for structural analyses and design

CODES OF GOOD PRACTICE

Photo: View showing processing of G1 base layer

06 Broad-Based Black Economic Empowerment

EKS Consulting Engineers contributes to the socio-economic transformation of South Africa in its adoption of the principles and requirements of Broad-Based Black Economic Empowerment (BBBEE). BBBEE is a South African Government initiative driven by the Department of Trade and Industry (dti). It aims to facilitate the involvement and participation of all historically disadvantaged individuals, broadening the country's economic base and stimulating economic growth and employment.

EKS Consulting Engineer's BBBEE initiatives are aligned with the dti's Codes of Good Practice and geared towards the Construction Sector Transformation Charter. These initiatives focus on transformation, bringing about substantial change in the racial and gender composition of ownership, control and management within EKS Consulting Engineers. A further focus is the effective advancement of employment equity while adhering to the principles of non-racialism and non-sexism – skills development – accelerating the advancement of black men and women, disabled people and designated groups with the emphasis on bursaries, learnerships and technical training.

07 Corporate Social Responsibility

Corporate Social Investment (CSI) is an integral part of our BEE transformation, corporate accountability and governance programme, and is a key component of our stated objectives. We recognise that as a corporate citizen in South Africa, as EKS Consulting Engineers, we have the responsibility to our stakeholders and the communities in which we operate.

We contribute to a more vibrant world through a socially responsible and sustainable approach that includes sharing our knowledge and skills. EKS Consulting Engineers and its people embrace the philosophy of giving back to the community by encouraging proactive involvement in the company's multiple corporate social responsibility (CSR) initiatives.

Since communities have different needs, our CSR programmes encompass different aims, ranging from empowering youth to be successful, active citizens, to financial assistance of food and shelter. Our industry enables our people to contribute in the most practical and effective ways by providing input into community development and infrastructure in needy areas all around different communities.

09

Leadership Team

Our people are highly motivated by the fact that the work we do in engineering, management and specialist technical services makes a real difference to the communities in which we live and work.

Professional Affiliation

Members of our staff are registered members of the following professional organisation:

- Engineering Council of South Africa (ECSA)
- Concrete Society of Southern Africa (CSSA)
- South African Institution of Civil Engineering (SAICE)

Company Affiliation

The company has membership registration with the following councils:

- Consulting Engineers South Africa (CESA)
- South African Black Technical and Allied Careers Organisation (SABTACO)

REAL DIFFERENCE TO THE COMMUNITIES

10

Quality Assurance

EKS Consulting Engineers is governed by management systems encompassing its areas of operations.

The management systems address all EKS Consulting Engineers activities across the concept, feasibility and planning phases as well as the design, construction, operation and maintenance phases of each project.

11

Health and Safety

EKS Consulting Engineers has a comprehensive safety governance framework and management system in place.

Our organisation supports a zero harm philosophy and encourages a culture of 'safety first'. Our work environment actively cares for people.

Through our health and safety management system, our goal is to provide:

- A safe and healthy work environment
- Appropriate assessment and consideration of occupational health and safety issues in all work undertaken

Processes to:

- Prevent incidents implement Hazard reduction
- Assess, manage, control and reduce risk
- manage injury and rehabilitation
- Promote health and continual improvement
- Provide expertise and resources to implement and maintain our Health and Safety Policy.

12

Sustainability

EKS Consulting Engineers is committed to the principles of sustainable development - meeting the needs of the present without compromising the ability of future generations to meet their own needs.

We recognise the need to balance economic growth with social development and the protection of the environment.

In demonstrating our commitment to these ideals, our corporate challenge is to embed sustainability as an integral part of our culture, our skills and our deliverables.

We are:

- Helping our clients, partners and stakeholders meet their sustainability commitments
- Incorporating sustainability considerations into our services and project deliverables
- Increasing our sustainability knowledge, skills and tools
- Incorporating sustainability into our corporate values
- Reducing the footprint of our operations, including our carbon emissions

In responding to the broader sustainability and immediate climate change challenges, we encourage innovation and support sound scientific and engineering research into enhanced energy, building, water and infrastructure solutions that meet community needs, now and into the future.

Name**Mr. M.M. Phofu****Position & Qualification**

Design Civil Engineering Technologist
(Pr. Tech Eng., B-Tech: Eng. Civil & N.Diploma Civil)

Responsibility

Mr. M.M. Phofu is responsible for the planning and designing of projects, community participation in the project, preparing scoping reports, technical reports, preliminary reports, detailed design reports, design review and documentation. Presentations of project scoping reports, technical reports, preliminary designs and detailed design reports to clients, prepare construction drawings, facilitate project meetings, and prepare certificates, project management, liaising with client, contractor and supervision of project until completion. I also prepared close out reports and as-built drawings for the projects.

Skills

He has the following skills: Drivers licence Code 10 (C1), He also has work experience in the design, supervision and project management of civil engineering projects. Projects vary from water and roads and storm water. I am also proficient with Microsoft Office (MS Word, Excel, Powerpoint and Outlook), AutoCAD, Model Maker, Microsoft Project and Civil Design

Name**Mr. D.C. Sikhitha****Position & Qualification**

Senior Scientist and Project Manager
(BSc: Community Water & Sanitation) and Postgraduate Diploma in Project Management

Responsibility

Mr. D.C. Sikhitha is responsible for the planning of projects, community participation in the project, preparing scoping reports, technical reports, preliminary reports, detailed design reports, design review and documentation. Presentations of project scoping reports, technical reports, preliminary designs and detailed design reports to clients, prepare construction drawings, facilitate project meetings, and prepare certificates, project management, liaising with client, contractor and supervision of project until completion. I also prepared close out reports and as-built drawings for the projects.

Skills

He has the following skills: Drivers licence Code 10 (C1), He also has work experience in the community water services and sanitation, supervision and project management of civil engineering projects. Ms Office, Ms Excel, Power Point, AutoCAD Level 1, AutoCAD Level 2, Civil Design (Design Centre, Survey, Terrain and Water)

Name**Mr. N.R. Nekhalale****Position & Qualification**

Senior Civil Engineering Technologist
(Pr. Tech. Eng., B-Tech & N. Diploma: Eng. Civil)

Responsibility

Mr. N.R. Nekhalale is responsible for the planning of projects, community participation in the project, preparing scoping reports, technical reports, preliminary reports, detailed design reports, design review and documentation. Presentations of project scoping reports, technical reports, preliminary designs and detailed design reports to clients, prepare construction drawings

Skills

He has the following skills: Drivers licence Code 10 (C1), He also has work experience in the design, supervision and project management of civil engineering projects. Projects vary from water and roads and storm water.

Name	Mr. R. Jones
Position & Qualification	Contracts Manager (B-Tech, N. Diploma: Eng. Civil & Pr. CPM)
Responsibility	Mr. R. Jones is responsible for compilation of tender documentation. Compilation of GCC 2015 Contracts. Develop project execution plans. Applying quantity surveying measures on site. Issuing of site instructions and defects reports to correct quality or time misalignments. Ensuring project activities are scheduled. Monitor and ensure compliance of contractors and personnel to project risk and safety requirements. Provides effective and timeous feedback to Project Manager. Conducting regular site meetings and issuing site meeting minutes and action items. Prepare bi-weekly progress reports for submission to the various stakeholders. Applying the GCC principles and contract conditions.
Skills	He has the following skills: Drivers licence Code 8 (C), He also has work experience in the contract management, supervision and project management of civil engineering projects.

Name	Mr. T. Sikhitha
Position & Qualification	Civil Engineering Technician (N. Diploma: Eng. Civil)
Responsibility	Mr. T. Sikhitha is a junior civil engineering technician in roads & stormwater, water and structural projects. He is an assistant resident engineer responsible for preparation of construction drawings, facilitate project meetings, and prepare certificates, project management, liaising with client, contractor and supervision of project until completion. He also prepares close out reports and as-built drawings for the projects.
Skills	He has the following skills: Drivers licence Code 10 (C1), He also has work experience in the water services, roads and storm water, structural works, supervision and project management of civil engineering projects. Ms Office, Ms Excel, Ms Projects, Power Point, AutoCAD Level 1, AutoCAD Level 2, Civil Design 6.5 (Design Centre, Survey, Terrain and Water)

Name	Mr. V. Sikhitha
Position & Qualification	Civil Engineering Technician (N. Diploma: Eng. Civil)
Responsibility	Mr. V. Sikhitha is a junior civil engineering technician in roads & storm water projects. He is an assistant design technician and resident engineer responsible for geometric design, preparation of construction drawings, facilitate project meetings, and prepare certificates, project management, liaising with client, contractor and supervision of project until completion. I also prepared close out reports and as-built drawings for the projects.
Skills	He has the following skills: Drivers licence Code 10 (C1), I also have work experience in roads and storm water works, supervision and project management of civil engineering projects. Ms Office, Ms Excel, Ms Projects, Power Point, AutoCAD Civil 3D Level 1, AutoCAD Civil 3D Level 2, Civil Design 6.5 (Design Centre, Survey, Terrain and Water), Using a dumpy level and theodolite.
